I hereby agree not to remove the eligible appliance from service for five years. I understand that this rebate is available only through authorized propane marketers in Nevada, that it is not a government program, and that the program may end at any time. I understand the Nevada Propane Dealers Association assumes no responsibility whatsoever for the installation, inspection or testing of the qualifying appliance or any associated gas system and, by issuing a rebate, makes no representation, warranty or guarantee regarding the qualifying appliance or the associated gas system. The NPDA disclaims any liability for any personal injury, property damage, business losses, or any other damages of any other nature whatsoever, whether special, indirect, consequential or compensatory, directly or indirectly arising from the installation of the qualified appliance.

I understand and agree to all rules and conditions for participation in this program. I acknowledge that the installation at this location is eligible for a rebate and that the installation meets all program terms and conditions. I hereby declare that I am authorized to sign this application and that the information stated herein is true, correct and complete to the best of my knowledge. I agree to comply with all laws, rules and regulations governing the installation of the qualifying appliance and with the manufacturer's installation instructions. By signing this application, I affirm that this installation passed the safety inspection defined in the program and certified by the attached inspection record.

## ***Nevada Propane Dealers Association*** **Safe Appliance Installation Rebate Program**

**WHO IS ELIGIBLE?** Rebates are available to Nevada propane customers who have a safe, professional installation of a propane appliance or hearth in a new construction that does not qualify for the PERC Builder's Incentive Program, or that replaces an electric, natural gas, wood, heating oil, wood pellet model, or old propane appliance. Propane companies and their employees are not eligible to receive rebates.

**WHAT APPLIANCE INSTALLATIONS ARE ELIGIBLE?** The following safe appliance installations are eligible:

- Furnace - \$300
- Water heater (tank or tankless) - \$300
- Hearth appliance/fireplace insert - \$100
- Stove/oven/cooktop - \$100
- Clothes dryer - \$100

Installations must take place in Nevada and be inspected by a propane marketer with operations in Nevada. With NPDA prior approval, installations may take place outside of the State of Nevada by a propane marketer with operations in Nevada. However, purchase of the appliance must be made in the State of Nevada. Only one rebate shall be paid for each eligible installation and the NPDA reserves the right to limit the total number of rebates that may be paid to an applicant. The intent of this program is to provide rebates to newly installed appliances that replace an electric, natural gas, wood, heating oil, wood pellet model, or old propane appliance.

Completed and approved applications should have a rebate check issued within 60-90 days after the application is received at the NPDA office, subject to available funds. No applicant has a legal right or other entitlement to receive rebates under the program or this agreement. A completed application does not bind the NPDA to approve or pay a rebate to any applicant.

An applicant or propane marketer may be suspended from or declared ineligible to participate in the rebate program if the NPDA determines that the applicant or propane marketer has submitted false information or otherwise violated program terms and conditions. Within 30 days after NPDA suspends or declares an applicant or propane marketer ineligible, the applicant or propane marketer may appeal the action by submitting the appeal in writing to the NPDA. Actions taken by the NPDA with respect to the appeal will be final. An applicant or propane marketer who submits false information pertinent to a rebate is subject to criminal and civil penalties including U.S. Mail fraud.

**WHAT IS THE REQUIRED SAFETY INSPECTION?** A safety inspection must be performed by or on behalf of a participating propane marketer after the installation of each new qualifying appliance and the result of that inspection must be documented on the application form. The safety inspection for qualifying appliance installations must, at a minimum, include the following: 1) a leak test; 2) a pressure test if required by applicable laws, rules and regulations; and 3) a flow and lock up test on the regulator(s). A "Gas Check" is an acceptable safety inspection. Written documentation of the safety inspection is required.

All applications must have a delivery date no later than 30 days after the safety inspection. The NPDA will reject any application with a delivery date later than the 30-day period. If the NPDA rejects an application with a late delivery date, a re-inspection will have to be performed and the application resubmitted according to the terms and conditions of this agreement.

**WHEN DOES THE PROGRAM END?** The rebate program will run continuously until such notice from the NPDA. The payment of a rebate under the program or this agreement is subject to available funds. If available funds run out during the program year, the NPDA may elect to carry over applications until the next program year. All eligible installations must occur during the rebate program. Installations that are not for permanent use are not eligible for the rebates.
