Serving the Propane Industry Since 1946

News, Information and Products for the LP-Gas Equipment Professional

Hall of Flame Inductee, Phil Comstock

Congratulations to Phil Comstock of Delta Liquid Energy on earning the Hall of Flame award for his 40+ year career in the propane industry.

The award was presented by Blair Poulsen (retired industry veteran) at the annual Nevada Propane Dealers Association Conference.

The Hall of Flame Award is presented to individuals who go above and beyond in their service to the propane industry. Thanks and congratulations to Phil and all of the Hall of Flame inductees who have come before him.

Thanks to everyone who joined us at Teeco's Open House and Golf Tournament!

Teeco customers enjoyed free training sessions from Algas, Smith Pumps, Red Seal Measurement (Neptune Meters) and Corken, along with some cool swag and a chance to learn about propane industry equipment and services while visiting various vendor booths. There were also some great raffle prizes and a delicious barbecue lunch shared with industry colleagues.

The Teeco - Quality Steel Golf Tournament, held the following day, provided an opportunity to bond and enjoy some friendly competition at the scenic North Shore Golf Course.

Thanks to all our vendors and sponsors who made it all possible, and to Teeco's Auburn, WA Team for being the hosts with the most!

Quality LP Gas Products from a Company You Can Trust

Outside the Box

With Jay Stephens

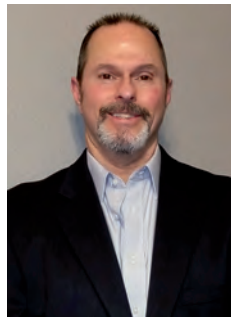

President and CEO
Teeco Products, Inc.

With hectic lives and all that's going wrong in the world, it's easy to get caught up in the negative and forget that there truly is a lot to be thankful for. We can give thanks for our loved ones, beauty in nature and a country that allows us the freedom to live in relative peace and comfort. We can also give thanks for those whose foresight and determination created the foundations of this country that we hold so dear.

As election season is upon us, it's important to honor those who came before us and fought for those rights by participating in the electoral process.

Our beautiful country was founded on the principals of life, liberty and the pursuit of happiness, knowing that all humans are created equal.

No matter where you land on the political spectrum, it's important to be informed of the facts and to use the power of your voice. The right to vote is one of the most powerful tools a citizen has. It transcends political affiliation, age, social status and all of our other various differences.

Whether you vote by mail or physically drop off your ballot on election day, let your voice be heard.

And let us remember that Freedom isn't a finite resource. There is enough to go around. Let us treat our neighbors with love and respect, regardless of which boxes they check on their ballot.

Jay Stephens

Words to live by –

“Liberty, when it begins to take root, is a plant of rapid growth.”

- George Washington

Inside **TEECO**

Teeco Welcomes New Regional Sales Manager, Gavin Sharp

I started my career in the propane industry in 2009 with Heritage Propane as a manager in training and left as a district manager when they were acquired by AmeriGas in 2012.

I went on to work for Ferrellgas for a short period of time in Arizona while exploring the Southwest in my 20's. I left and went back to the East Coast to help start a mom and pop operation in my hometown in 2013. After 5 years with Adam's Propane. I shifted solely into a sales role with Woodfin, where I stayed for over 5 years before coming to Teeco.

Gavin Sharp is Teeco's Regional Sales Manager for the 4 Corners Territory, serving Colorado, Utah, Arizona and New Mexico. We are thrilled to have him join the Teeco Family!

TEECO Topics is published four times yearly by TEECO Products, Inc. as a service to our customers. 3,000 copies are distributed to customers and selected LPG industry leaders.

PRODUCT

SPOTLIGHT

Teeco is Excited to Announce That We Now Offer Products From

420 Cylinder Upright Sling

ST-420 Sling

Custom designed with superior quality. NEW with colored straps so you can always find the top and bottom with ease. The Fisk cylinder sling is the only sling on the market to lift and protect your propane tank. With flaps on the inside of the ratchet and all metal parts, the paint job on your cylinder racks will stay fresh and scratch free. Designed specifically for the propane industry.

Tank Saddles

ST-X Saddle Set

Aluminum X brace construction. Super strong, super light. Angled top eliminating tank rolling or sloshing of product. White, non-marking rubber bumpers (replaceable). Ergonomic handle. Fits 120 gal through 1,000 gal tanks. Conforms to DOT special permit 13341. 6" wide x 6" high x 16" long. 8 pounds each. Set of 2.

Poly Pipe Holders

F-ACCS-PY-00010001 (for .5 inch pipe)

F-ACCS-PY-00020001 (for .75 inch pipe)

Provide secure transport for your poly pipe. Available for 1/2 inch and 3/4 inch pipe. Holders adjust to fit your needs. 28" x 16" x 7.5". 9.85 pounds.

Flex Riser Storage

TX-OP Riser Box

This flex riser storage unit is a game-changing solution designed to streamline the transportation and organization of flex risers for field use. Engineered with convenience and efficiency in mind, the innovative storage system easily integrates with your existing box pack.

Equipped with specially designed slots, it simplifies inventory management by allowing you to quickly and easily take stock of your flex risers. Ideal for saving valuable time when drivers need to restock and prepare for field operations.

Teeco Rapid City Rinnai Training

Teeco's Rapid City, SD team hosted a Rinnai Tankless Water Heater Training at their location this summer. Customers were able to get a front row seat to the installation process and enjoy lunch with the Teeco and Rinnai teams.

Thank you to Carlos Rodriguez and Ricky Rogero of Rinnai for providing this installation and training free of charge!

Rinnai

Madison River Propane Customer Appreciation Events with Mike Lorenz

Hats off to our friends at Madison River Propane for some great Customer Appreciation events this summer!

Events were held at their locations in Ennis and Townsend, Montana and were all about sharing good times with their customers. Teeco's Regional Sales Manager for the Rocky Mountains, Mike Lorenz, volunteered his barbecue skills for a tasty lunch and customers enjoyed booth visits and raffles.

Teeco's Auburn, WA Team Gets Certified to Train Customers on Continental Fittings

Butch Hartwick of Hubbel Incorporated, who manufactures both Continental and RW Lyall Risers and Fittings, paid a visit to Teeco's location in the Pacific Northwest to give our crew (and a few local customers) the training they need to certify customers on Continental Fittings.

In addition to the team at our Auburn, WA location, our Regional Sales Manager, Randy White can train customers on the road at their location.

Let us know if you or your crew need training on Continental Fittings or other product lines we carry!

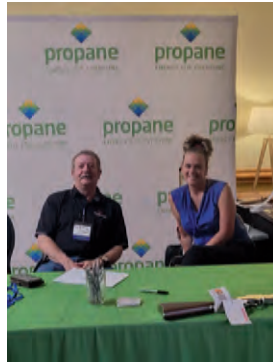

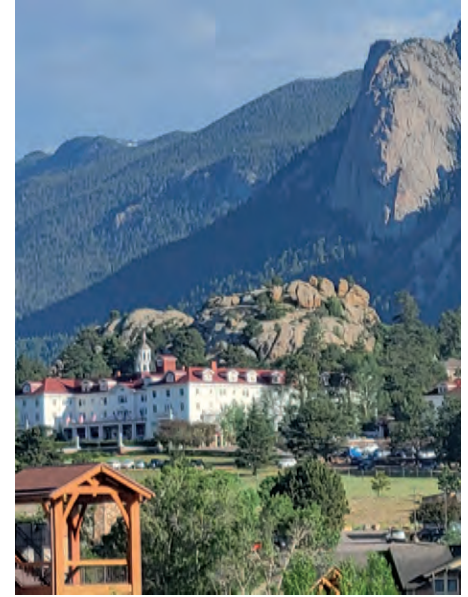

Colorado / New Mexico Convention with Teeco's Jay Stephens and Mike Lorenz

This year's Colorado / New Mexico Convention in Estes Park, CO drew over 150 people. The event spanned 3 days and was packed with activities, kicking off with a golf tournament and an off-road tour of Rocky Mountain National Park.

Attendees also enjoyed leak check training, presentations from David Lowe (Pro Image), Ben Nusdorff (NPGA), and Bryan Cordill (PERC), a Bobtail Rodeo, and a vendor reception that included a cornhole tournament.

The event wrapped up with a membership meeting and board elections.

North Dakota Propane Convention with Mike Lorenz

Teeco's Regional Sales Manager for the Rocky Mountains, Mike Lorenz, joined industry colleagues at the North Dakota Propane Convention in Medora for some industry meetings, updates on the new 2024 editions of NFPA 54 & 58, a presentation on *The Future of Renewable Propane*, networking and, of course, a round of golf. Pictured to the right are Steve Sikkema of HTP Energy, Jade Ziman and Dani Husek of Western Choice Coop Kildeer ND, and Lorenz.

Algas Vaporizer Training in Auburn, WA

Ray Gutierrez of Teeco Products and Kirsten Bellar of Algas co-hosted a vaporizer training session at a facility near Teeco's Auburn, WA branch. The training covered Algas-SDI's Direct Fired and Electric vaporizers, with details on vaporizer operation, individual component overviews and required maintenance for the product lines. Attendees also learned how to size and select the right vaporizer & proper installation techniques.

Skid Mounted Algas-SDI Vaporizer Packages from Teeco - GET YOURS TODAY!

Teeco's Skid-Mounted Vaporizer Package

A plug-and-play solution designed to make your installation process as smooth as possible.

With this system, all the heavy lifting is already done. The Quality Steel tank and Algas-SDI vaporizer are securely mounted to a skid, creating a single unit. Simply connect the vapor line to the outlet of the skid and provide power to the vaporizer and you're ready to go.

When a propane tank is just not enough...

This package is ideal for situations where your propane tank alone isn't able to supply enough BTUs to meet demand. The Algas-SDI vaporizer efficiently converts liquid propane from the bottom of the tank into vapor, increasing BTU output.

Because this system must be explosion-proof, it is only available with an electric vaporizer.

Quality Steel Tanks are proudly manufactured in the USA and rated at 250 psig from -20°F to 125°F. All vessels are UL listed and shipped vacuum pre-purged to enable simplified first fill of the tank.

Algas-SDI's TORREXX Electric Vaporizer is a single core, dry electric vaporizer that is self contained and requires no additional remote mounted controls for operation. With no start/stop switches when power is applied the TORREXX is ready for full load operation in less than 60 seconds from a cold start.

Have you seen RegO's new Presto-Link...?

Ask your Teeco Sales Manager for a demo

Fast, Accurate Testing

The Presto-Link Bluetooth device communicates with the RegO app so you can check pressure readings on your mobile device.

The result is a safe, secure, efficient and cost-effective way for onsite personnel to obtain pressure readings to assist with fine tuning and troubleshooting a propane vapor system.

Presto-Link® Features & Benefits

- Bluetooth connection through Android or Apple Device
- Lightweight & compact design
- Battery percentage indicator
- 1.5 times overpressure protection
- Bluetooth connection up to 100-foot range allows for troubleshooting and adjustment to systems while recording the pressure
- Visual indicator for pressure settings; Red casing indicates a high-pressure device (0-250 PSI) and black casing indicates a low-pressure device (0-50" wc)

Inside TEECO

Who Is It?

This Mystery Guy was born in Fullerton, CA and is one of 3 generations of Teeco Team members in his family. He started working at Teeco while he was in high school. (We won't say how long ago that was...)

His favorite teams are the Angels and the Anaheim Ducks. In his spare time, he enjoys hanging out with family and friends, and taking his 96 year old grandmother to the casinos for a fun day out!

Which Teeco Family Member are we talking about? Email your answer to: mary@teecoproducts.com

Answer to last "Who Is It?"

Ray Gutierrez, Teeco Regional Operations Manager, Auburn, WA

I was working to become a tattoo artist before I started in propane, while also working as a barista at Starbucks.

I have always loved art and cars.

I love spending time with my family and friends.

I have many hobbies, that I diligently learn about, but then I move on to others once I have spent time on them.

Inflation Busters

We've worked with manufacturers to reduce prices on some key product lines!
